FERNANDO GÓMEZ HERRERA
BSC. & MSC. SOFTWARE ENGINEER

Hello,

The position you offer is of interest for me and that's why I'm getting in touch with you.

About me

I am a **Mexican BSc. & MSc. Software Engineer** with wide experience in **web technologies** and recently with deep learning. I have been working as a **freelance** for almost **4 years** and since *high school* I have been working during summers either in personal projects, at startups or studying abroad; once I even had the opportunity to go to **Silicon Valley** and work at **Hewlett-Packard,** then won an internship at Stevens Institute of Technology (New York Area) and research on ML Visualization. I invite you to check out my portfolio (which I designed, btw).
I'm very **curious** about the latest **Javascript, React** and anything related to Web Development, also I would like to learn more about Startup funding in the future; I'm learning new stuff every day. I love to practice yoga or take long walks. I'm a bookworm, geek, anime fan and tech entrepreneur.

Projects and code samples

My very first project (when I was at high school, almost *9 years ago*) was implemented in a **Mexican University** called **UACM**. They still use it but it has received some changes **[1]** It helped a lot to their social service office for signing new students and to improve their response times.
Also, I've been working in **my portfolio and blog** for about two months (design and code), and I'm proud of how it's looking **[2]** I'd like to highlight some useful and fun projects you can find there:
√ **Bank Transactions App.** React 16 & Sinatra application to consult bank transactions using Plaid **[3]**
√ **Text Adventure Game.** Ruby web application that allows playing the revised and improved version of "Werewolves and Wanderer" text adventure game **[4]**
√ **Hycons.** An iconset that was very popular for KDE (Linux) a while ago **[5]**
√ **Portfolio Risk Analysis App.** Mockup I designed and implemented when I was working at HPE Labs **[6]**

I'll be very glad to hear from you.

Best regards,

Fernando G.
